

# KEEP NATURE CLEAN

---

Littering is one of today's major challenges. Along Kongsfjordelva, like other salmon rivers, this has been a problem for many years. Garbage left behind by fishermen is also a threat to birds and animals.

Keep in mind that disposable barbeceue grills, empty beer/soda cans and bottles must be disposed properly. This also applies to fishing lines, plastic packaging etc.

-  **Bring all your litter back home or to a container.**
-  **Do not clean the fish by the river.**
-  **It is not allowed to shed green wood. Use firewood or fallout trees. Use existing fireplaces only.**
-  **Tenting must take place away from the riverside and popular fishing spots.**

**Report to the river guard - 99375118 if you observe littering along the river.**

**Let 2018 be the year of pure nature experiences – keep the river clean!**
